

## Getting Started is Easy

The road to a better, more confident you has never been easier. After an initial consultation with a specially qualified orthodontist, In-Ovation can be placed on your teeth usually in less than one hour. Depending on your doctor's treatment plan, you may visit the office periodically to monitor your progress. That's it!

Treatment time typically lasts 12-16 weeks, but it may be a bit longer depending on your specific treatment plan. After your doctor removes In-Ovation, you are left with an amazing new smile!

## Reveal Your Inner Smile...

A healthy smile and greater self-confidence are investments that last a lifetime. Now, with In-Ovation, improving your appearance has never been easier or more affordable. To find out if you are a candidate, speak to a specially qualified In-Ovation orthodontist to see if the system is right for you.

For more information on the In-Ovation system and the benefits of a healthy, more confident smile, visit [www.inovationsmile.com](http://www.inovationsmile.com).

# The Invisible Way to Enhance Your Smile™ ...

Now you can achieve the smile you've always wanted without lengthy treatment times, expensive cosmetic dentistry or coping with an altered appearance during treatment.

In-Ovation® works gently to guide your teeth into proper alignment. The system is so comfortable and easy to manage that you will forget you are wearing them. Without visible braces or removable trays, you can eat, speak, laugh and smile without anyone ever seeing your style of treatment. Your smile will be improved quickly, usually in several weeks\*. In-Ovation is an affordable, easy solution to reveal your inner smile.

- **Exceptionally affordable**
- **Gain confidence with a better smile**

In-Ovation LMTM uses an exclusive Quick Clip™ technology for a comfortable, completely invisible treatment process.

## What is In-Ovation LMTM?

In-Ovation addresses the six upper and six lower teeth revealed when you smile. After an initial consultation, your doctor applies In-Ovation Quick Clips™ to the back of your teeth. Comfortable and easy to wear, In-Ovation is hidden throughout the entire treatment process.

## Can In-Ovation LMTM Benefit Me?

In-Ovation has helped many patients, both teens and adults, improve their smile in a matter of weeks. Because they are easy to wear and treatment is so effortless, nothing comes between you and having the smile you have always wanted. According to the American Association of Orthodontists straight teeth may lead to the following health benefits:

- **Healthier teeth and gums**
- **Easier to maintain oral hygiene**
- **Decreased risk of abnormal wear of tooth surfaces**

Length of treatment: 18 weeks

\*Treatment times vary depending on the individual patient.

## Made to Fit Your Lifestyle

Whether you are active in sports, busy in school or an active professional, In-Ovation is the treatment of choice that works best with any lifestyle. You can eat, speak, drink and travel without ever worrying about your treatment's progress or misplaced trays or elastics. In fact, In-Ovation is so comfortable that most people forget they are even in treatment! With In-Ovation you can...

- **Eat and drink without having to remove anything**
- **Improve your smile without ever changing appliances**
- **Speak clearly and confidently**
- **Begin treatment in under an hour**
- **Enjoy fast, fully undetectable treatment**
